Jio Business

The most cost-effective and scalable, fixed voice solution for your business

Session Initiation Protocol (SIP) Trunk is an IP-based voice & video service which allows you to make and receive calls through IP-PBXs.

SIP Trunk is more advanced as compared to traditional PRIs. It converges multiple voice channels in a single line, eliminating the need for separate physical media. It also allows you to increase and decrease channel as per your requirement, making it a highly scalable and flexible solution.

Benefits

Avoid bill shocks

Fixed monthly rental for unlimited domestic calling

Reduce cost of ownership

No additional PRI cards for upgrades

Scale as you grow

Flexibility of adding channels as required

Simplify operations

Single link for bulk voice requirements

Upgrade easily

Legacy infra supported with Jio's PRI-SIP convertors

Reliable

Resilient network for high uptime

Features

Multiple DIDs

Provide fixed line number at every work station

Highly scalable

Go up to 5,000 channels on a single link

Telemarketing

140XX numbers with outbound facility

Interoperability with PBX

Supports most of the commonly available IP-PBXs in the market

Call type configuration

Domestic and international call type configurable at trunk level

Digital self-care

Simple and intuitive interface to manage your service
